

PIBTC
THE DUAL LEGEND
Official Whitepaper

ABSTRACT

PIBTC is an experimental meme-driven cryptographic asset built on the Binance Smart Chain (BSC). By synthesizing the scarcity principles of Bitcoin with the community-centric ethos of the Pi Network, PIBTC introduces a hyper-scarce ecosystem capped at 15,000,000 tokens. This document outlines the technical, economic, and philosophical framework of the PIBTC project.

INTRODUCTION

The Philosophy of Scarcity

In a market saturated with inflationary tokens and fleeting trends, PIBTC emerges as a project rooted in the fundamental laws of supply and demand. Inspired by the "Dual Legends" – Bitcoin, the pioneer of digital gold, and Pi Network, the pioneer of social crypto – PIBTC aims to explore the ceiling of value through extreme scarcity.

We define ourselves as an Experimental Meme Token. We do not promise utility that does not exist; instead, we offer a transparent, community-driven experiment in scarcity and collective belief.

TOKENMICS: SUPPLY & DISTRIBUTION

The total supply of PIBTC is fixed and unyielding. With a cap of 15,000,000 (Fifteen Million), PIBTC is mathematically scarcer than Bitcoin itself.

CATEGORY	ALLOCATION	AMOUNT (PIBTC)	PURPOSE
Liquidity & Listings	65% 9,750,000		Stability and market accessibility
Future Development	25% 3,750,000		Ecosystem expansion & partnerships
Airdrop (Pioneers)	5% 750,000		Reward for early community builders
ICO (Presale)	3% 450,000		Initial capital for liquidity injection
Team Allocation	2% 300,000		Vested over 5 years to ensure alignment

TECHNICAL INFRASTRUCTURE

PIBTC is deployed on the Binance Smart Chain (BSC) using the BEP-20 standard. This choice was made to provide:

Efficiency: Lightning-fast transaction confirmation times.

Low Barriers: Minimal gas fees, ensuring that even small holders can participate in the ecosystem.

Interoperability: Seamless integration with major wallets (MetaMask, Trust Wallet) and decentralized exchanges (PancakeSwap).

ROADMAP

Phase 1: Genesis & Awareness
Smart Contract Deployment and Audit.

Initial Coin Offering (ICO) and Community Airdrop.

Listing on CoinMarketCap and CoinGecko.

Phase 2: Community Expansion
Tier-2 Centralized Exchange (CEX) listings.

Global marketing push targeting "Pioneer" communities.

Strategic partnerships with other meme-ecosystems.

Phase 3: The Benchmark of Scarcity
Exploration of cross-chain bridges

Implementation of community-led "Utility Proposals."

Establishing PIBTC as the standard for "Scarce Meme Assets."

RISK & DISCLOSURE

PIBTC is an experimental project. By participating in the PIBTC ecosystem, holders acknowledge that:

Market Volatility: Meme tokens are subject to extreme price swings.

Experimental Nature: The project's future depends entirely on community consensus and market sentiment.

No Financial Guarantee: PIBTC is not a security or a regulated investment product do your own research.
